

seeing above
seeing further
seeing differently

as a child, I had fun touching the sky with a stick

skywatcher 2
a mirror
in another life, a library cart

my body
two legs
two hands
two eyes

to move forward, backward, sideways

to stop
to bend over
to stand on tiptoes
to start again

sky watching
sky walking
sky writing
sky catching
sky seeking
sky seeing
sightseeing

from the station
a place of departure and arrival
to travel for real
to trigger the imagination

the undersides of the things
the ordinary
the details
the smallest things
daily life
routine

a simple device
to change the perception
to reflect on how to see
to communicate on an experience
to make connections

people stare
smile
snicker
side-eye
talk to me
question
what to do?
what to think?
what to see?

clouds
trees
architecture
electrical wires
planes
electrical wires
planes
birds
people

from a different perspective
upside down
the landscape passes by
like in a movie

the mirror frames or defines
a portion of the landscape
Verfremdungseffekt told me a sociologist
as through the viewfinder of a camera

calming an anxiety
living through the health crisis
going back to school
thinking differently

skywatcher 1
the body lying down
skywatcher 2
the body in movement
skywatcher 0
drawing skyshapes
a collection of “dispositifs”
to watch the sky
to question the gaze
